

## **ECONOMICAL AND ENVIRONMENT-FRIENDLY**

The Donauzentrum, also called Danube Shopping Center, is located approximately three kilometers from central Vienna. It is the biggest shopping center in the area, covering more than 225.000 square meters and is also the most diverse shopping mall in the vicinity. It boasts over 260 shops and includes cinemas, an entertainment center, medical facilities and provides lots of leisure activities. The center is operating three energy centers, with cooling towers and train chillers. During 2007 CQM (Cooling Quality Management Ltd.) from Israel, in cooperation with their local representation [D&M], installed six units of their advanced SRS-Technology (Scale Removing System). This technology is a non-chemical electrolytic water treatment system for replacing the traditional chemical treatment of cooling towers. On the chillers CQM installed three ATCS (Automatic Tube Cleaning System) to keep the chiller tubes constantly clean.

By now the systems installed by CQM have been operating for three years with great efficiency and our main advantages are:

- LARGE ENERGY SAVINGS
- WATER SAVINGS
- NO MORE USE OF CHEMICALS
- A SIGNIFICANT DECREASE IN MAINTENANCE EXPENSES

We wish to express our appreciation for the professional approach and the excellent after sale service provided by CQM/[D&M].

Prok. Thomas Fiedler
