CQM

re: **Recommendation Letter**

CQM machine was installed in GAN SHMUEL FOODS Ltd. a few months ago.

The machine was installed on an evaporator in the processing of juice and concentrate.

Before purchasing the CQM machine, we had to clean the condenser every three weeks with HCL (acid).

Since we put in the CQM system, evaporation capacity stays at its fullest and when the evaporator was opened for inspection it was found completely clean.

We ordered two more machines for the plant.

As a result from our experience with the CQM system, we recommend it.

Amram Golan
