Re: SRS Systems – for cleaning Towers

On August 2000 C.Q.M company has installed this system for treatment in the cooling towers.

Since the installation of C.Q.M technology, our production is running smoothly with no interruptions.

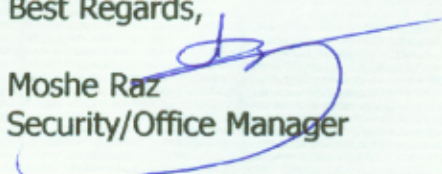

The benefits of CQM's technology shows direct cost saving in same levels:

1. In Chemical material.
2. Saving water.
3. Energy.
4. Keeping on clean cooling towers.

Following the above results we would like to express our satisfaction from CQM's technical ability and customs service.

We will pleased to help in any kind of information that needs.

Best Regards,

Moshe Raz
Security/Office Manager
