Attn: Mr. Udi Siboni

This letter is to confirm that C.Q.M.'S automatic condenser tube cleaning system are being used on TRANE Liquid chillers in the Israeli market.

Our experience shows that the C.Q.M. automatic condenser tube cleaning system, works effectively and allows the liquid chillers to work more cost efficient.

To our best knowledge, this system does not cause damage to the condenser tubes.

The TRANE organization is looking closely at this system for integration with our full line of air conditioning products.

Gordially Yours

Ron Sarid
General Manager
